PROFILE

MSc Computer Science student (Loughborough, expected Distinction, Sept 2026) with a BSc in Computer Games Technology. Built a real-time F1 data application processing live and historical race data via the OpenF1 API, including WebSocket-based data handling and race replay logic. Proficient in C#, Python, and JavaScript, with a background in object-oriented system design from multiplayer game development. Seeking a software engineering role.

TECHNICAL PROFICIENCIES

Languages	C#, Python, Java, C++
Web	HTML, CSS, JavaScript
Databases	SQL
Concepts	Object-Oriented Programming, Data Structures & Algorithms, Networking Fundamentals
Tools	Git, Visual Studio, Eclipse
3D Environments	Real Time Environments, Unreal Engine, Unity

PROJECTS

F1 Telemetry Website

- Built a full-stack F1 timing web app processing historical race data from the OpenF1 API, architecting session/lap/driver endpoints into a real-time timing tower and race results view
- Work with OpenF1 API to extract information and process the data to display the correct information
- Built responsive layouts using CSS Grid and Flex to handle dense, real-time tabular data across screen sizes
- Debugged and worked around live API authentication/CORS constraints, adapting the data pipeline when real-time access required paid auth

Python Database Management

- Developed a Python application to ingest and process CSV datasets
- Implemented data cleaning keeping only relevant data and transformation logic for inconsistent entries
- Generated data visualizations so users can analyze trends and insights

Mars Rover Control

- Designed and implemented an object-oriented simulation of mars rover movement
- Applied OOP principles
- Developed command processing to control navigation across a grid outputting final location.

PROFESSIONAL EXPERIENCE

Supervisor, Nandos | *Jun 2026 – Current*

- Lead and coordinate front and back of house to deliver smooth and efficient shift operations
- Supervise shift performance ensuring food quality, cleanliness and health and safety standards are met.
- Working with upper management to meet targets and resolve any issues in the store.
- Ensure daily KPI's are met such as food delivered to customers in under 10 minutes and keep gross product in line with expected values

Nandoca, Nandos | *Sept 2021 – Jun 2026*

- Maintain food quality and consistency in a fast-paced kitchen environment
- Operate under sustained peak-hour pressure while meeting service time KPIs
- Collaborate with management to optimize workflow and uphold brand standards
- Balance speed, accuracy, and quality control during high-volume service periods

Crew Member, McDonalds | *Jul 2019 – Jan 2022*

- Took customer's orders at the drive-through maintaining accuracy, clear communication and speed
- Delivered friendly customer service while working efficiently under pressure
- Checked orders for accuracy and completeness before handing them out
- Worked collaboratively with kitchen and front of house colleagues to ensure smooth service

EDUCATION

Loughborough University | *Sept 2025 – Sept 2026*

Computer Science MSc – (Algorithms, Software Engineering, Object Oriented Programming)

- Expected: Distinction

Anglia Ruskin University | *Sept 2021 – July 2024*

Computer Games Technology BSc (3D Environments, Unity, Unreal Engine, Real Time Environments)

- 2:2

Comberton Sixth Form | *Sept 2019 – May 2021*

Business BTEC

- D*DD

Swavesey Vilage College | *Jan 2015 – Jun 2019*

- Mathematics – 6
- English Language – 4
- English Literature – 4
- Combined Science – 6:5
